

Project Reference

St Johns C of E School Peterborough

:: Installation requirements

St Johns C of E Primary school in Orton Goldhay, Peterborough were looking for a durable yet easy to maintain floor finish in their new art room. The design also required an artistic finish to help create a stimulating learning environment for the children

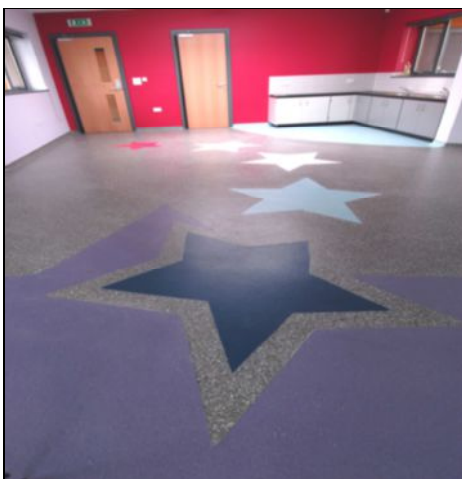

:: Why National Flooring?

Following discussions held with the client, National Flooring specified the Degafloor Flake system, which provides a durable and easy to clean finish, but also the flexibility to create a unique and bespoke design, which was required to help provide a more creative environment.

The design included six stars, decreasing in size. Each star was moulded from stainless steel trim and strategically placed to create a sweeping effect. Each star represented a different colour from the schools logo and complemented the surrounding décor.

National Flooring completed the work in four days, working alongside the main contractors, with minimal disruption to create a floor finish that reflects the modern and stylish extension.

Colette Firth, Headteacher said, "Our new flooring is very much a success - the kids absolutely love it! We are always receiving great comments about the room, people describe it as a very inspirational space and the flooring really brings the room alive and ties the look together. It is extremely functional for our busy school, very easy to maintain and always looks fresh and clean."
