

A photograph of a commercial kitchen with a long, narrow layout. The floor is covered in a light-colored, speckled resin flooring. On the left, there are stainless steel kitchen units, including a large refrigerator and a sink area. On the right, there are white cabinets and a sink area. The ceiling has various pipes, lights, and a fire alarm bell. The overall scene is clean and professional.

# COMMERCIAL KITCHENS

Resin Flooring Solutions

RESYN provides durable, hygienic, slip resistant resin flooring solutions, ideally suited for commercial kitchens.

Whilst we offer a range of internal and external resin systems, we specialise in the installation of MMA resin flooring solutions which are favourable when undertaking refurbishments, particularly where minimal downtime is required.

With extensive experience within this industry, we work closely with our customers to ensure they receive high quality, resin flooring solutions that last and with minimal disruption to the company's operating procedures.

# TYPICAL INSTALLATION AREAS:

# MINIMAL DOWNTIME & DISRUPTION

Extended trading hours within the hospitality sector can make it challenging to undertake refurbishment projects. Minimising disruption with the correct flooring products and effective planning is crucial.

Due to our experience working within this environment we have encountered a wide range of challenges and have successfully provided long term solutions that have been completed with minimal disruption.

- ▶ Two-hour cure time, after which the floor is fully functional.
- ▶ Flexible working programmes to minimise downtime.
- ▶ Turnkey solutions to maximise programme efficiency.

# LONG-TERM DURABILITY

Durability, performance and longevity are key considerations when choosing floors. Finding a flooring solution that can withstand the challenges of a busy commercial kitchen environment and remain fit for purpose can be difficult.

Whilst often cheaper to install initially, other commonly used finishes do not always offer long term durability unlike resin flooring solutions.

- ▶ Excellent resistance to physical and chemical attack.
- ▶ Exceptional bond to concrete, steel, tiles and marine ply substrates
- ▶ Maximum strength and durability offers better lifetime value.
- ▶ MMA resins are UV resistant and do not become brittle with age.

# HYGIENIC & SLIP RESISTANT

Achieving and maintaining good hygiene and safety standards are crucial to creating a safe and hygienic environment.

- ▶ Seamless and monolithic floors, reduce risk of bacteria and are easy to clean and maintain.
- ▶ Exceptional bond to substrates reduces delamination to improve hygiene and reduce trip hazards.
- ▶ Excellent slip resistant ratings, even under wet conditions.

# REDUCED MAINTENANCE

Ongoing maintenance costs can drastically increase a products life cycle cost, making them more expensive over time. Maintenance repairs can also disrupt operational processes. A resin flooring solution can reduce the need for frequent repair.

- ▶ Excellent bond to substrates reduces the risk of delamination and water ingress.
- ▶ Seamless finish reduces weak points and areas that are susceptible to failure such as welded joints or seams.

# COMPREHENSIVE CONSULTATIONS

A clear understanding of your specific circumstances, requirements and priorities is vital to identifying the correct flooring solution. We provide onsite consultations with experienced advisors to enable us to identify the most suitable product and plan around key challenges prior to installation.

- ▶ Floors that are fit for purpose.
- ▶ Accurate quotations and proposals.
- ▶ Realistic installation programmes.
- ▶ Reduced risks of additional costs and onsite delays.

# AFTERCARE & SUPPORT

At RESYN we place a strong emphasis on our flooring aftercare service to ensure that we maintain and strengthen relationships with our clients and to maximise the longevity and effectiveness of the floor.

- ▶ Cleaning packages.
- ▶ Cleaning advice and support.
- ▶ Onsite cleaning demonstrations.

# TURNKEY FLOORING PACKAGES

Many of our customers prefer the ease of working with one company to coordinate and project manage their schemes. Therefore, RESYN offers comprehensive turnkey solutions. As a result of this, we are able to cater for all flooring and flat roofing requirements including services associated with these works.

Since we take on the responsibility as one package, we can therefore offer seamless delivery and complete projects within specified timeframes.

- ▶ Removal and reinstatement of catering equipment.
- ▶ Removal of existing / defective floor finishes.
- ▶ Overlay of existing floor finishes (subject to condition).
- ▶ Subfloor preparation.
- ▶ Reinstatement of subfloor products, including fast curing underlay screeds and repair mortars and WBP Hardwood Marine Ply.
- ▶ Resin flooring solutions.
- ▶ Drainage solutions.
- ▶ Car park area and line marking solutions.
- ▶ Flat roofing solutions.

RESYN deliver our new build and refurbishment resin flooring projects, including the removal and repair of existing floors where appropriate, and the removal and reinstatement of all kitchen equipment. Having one point of contact for our account, combined with the service we receive from office and site staff, ensures projects are managed more efficiently.”
