

RETAIL

Resin Flooring Solutions

Within the retail environment, an increase in consumer demands together with extended opening hours, means planning in floor refurbishments can be a challenge.

Resin flooring provides an ideal solution as they can be installed quickly and efficiently and are flexible in terms of their finish.

They also offer exceptional durability and long-term performance to reduce maintenance costs and disruption.

A retail outlet can house an array of departments, all of which can have unique requirements. Within our product range we have a solution to suit most environments and can tailor our systems to meet your specifications. From highly aesthetic floors to practical, slip resistant finishes for kitchen and food preparation areas we have a solution.

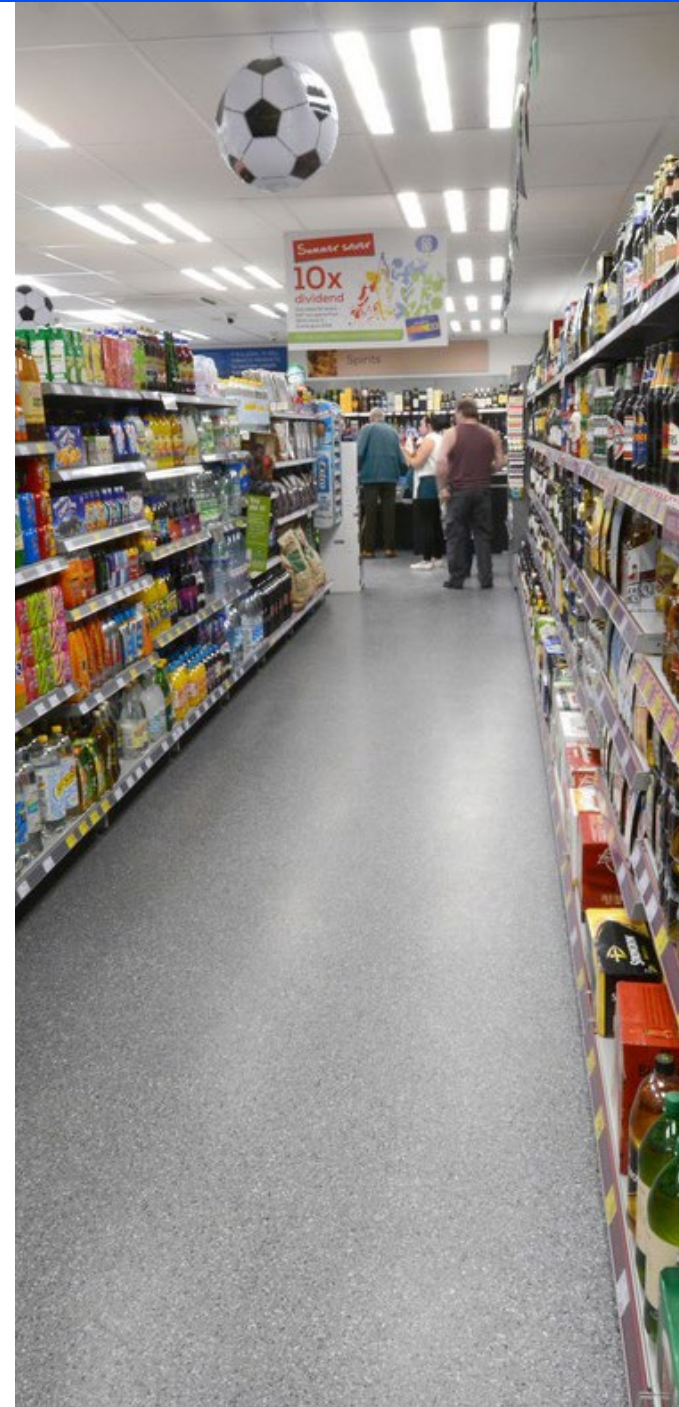

TYPICAL INSTALLATION AREAS:

MINIMAL DOWNTIME & DISRUPTION

Within a retail environment the time to complete floor refurbishment projects is particularly limited due to demands for longer trading hours. RESYN specialise in the installation of MMA resins and due to their unique quick curing characteristics, it is possible to complete installations during short closures.

Within just 2 hours of installation the area can be put back to full use and our installations can be completed out of trading to minimise disruption.

- ▶ Two-hour cure time, after which the floor is fully functional.
- ▶ Exceptional bond to concrete, steel, tiles and marine ply means we can overlay existing substrates.
- ▶ Flexible working programmes to minimise downtime.

LONG-TERM DURABILITY

Durability, performance and longevity are key considerations when choosing floors. Finding a flooring solution that can withstand the high footfall of a busy retail environment and remain fit for purpose can be challenging.

- ▶ Excellent resistance to physical and chemical attack.
- ▶ Exceptional bond to concrete, steel, tiles and marine ply substrates.
- ▶ Maximum strength and durability offers better lifetime value.
- ▶ MMA resins are UV resistant and do not become brittle with age.

HYGIENIC & SLIP RESISTANT

Achieving and maintaining good hygiene and safety standards are crucial to creating a safe and hygienic environment.

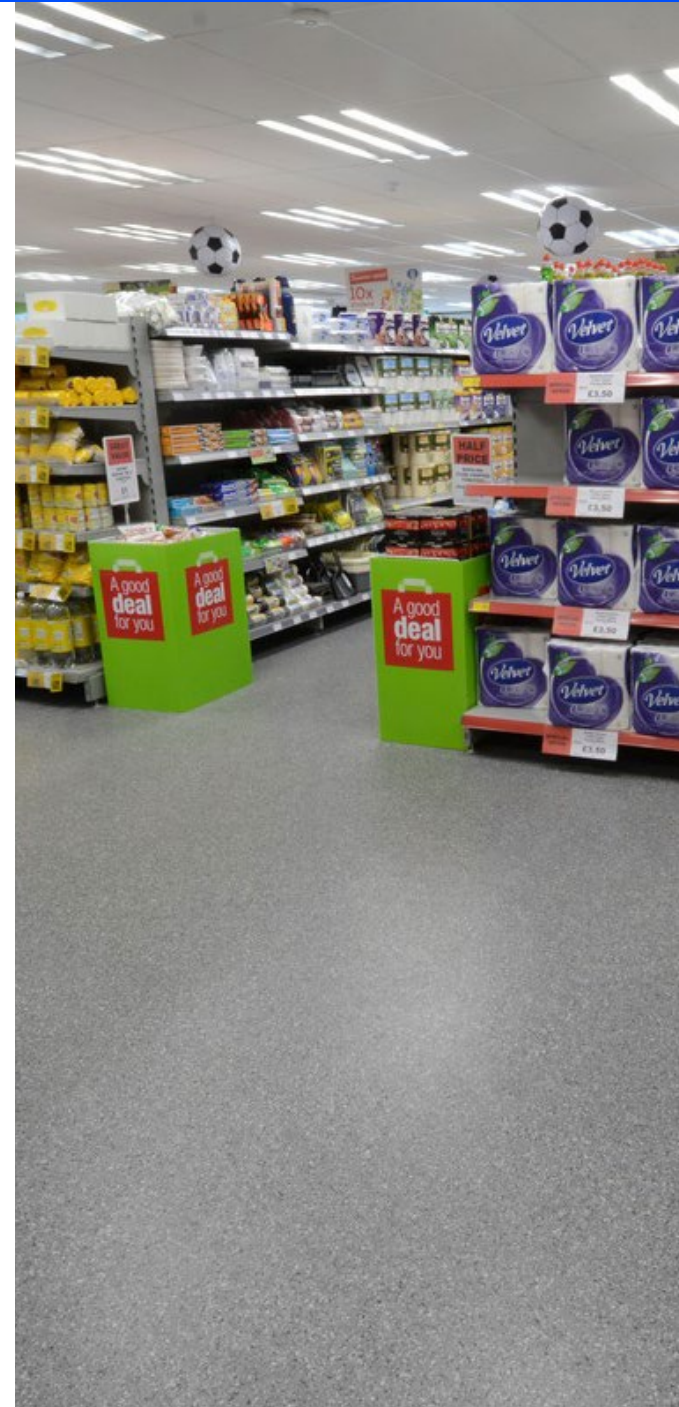

- ▶ Seamless and monolithic floors, reduce risk of bacteria and are easy to clean and maintain.
- ▶ Exceptional bond to substrates reduces delamination to improve hygiene and reduce trip hazards.
- ▶ Excellent slip resistant ratings, even under wet conditions.

REDUCED MAINTENANCE

Ongoing maintenance costs can drastically increase a products life cycle cost, making them more expensive over time. Maintenance repairs can also disrupt operational processes and finding the time to undertake them can be problematic.

- ▶ Excellent bond to substrates reduces the risk of delamination.
- ▶ Seamless finish reduces weak points and areas that are susceptible to failure such as welded joints or seams.

COMPREHENSIVE CONSULTATIONS

A clear understanding of your specific circumstances, requirements and priorities is vital to identifying the correct flooring solution.

We provide onsite consultations with experienced advisors to enable us to identify the most suitable product and plan around key challenges prior to installation.

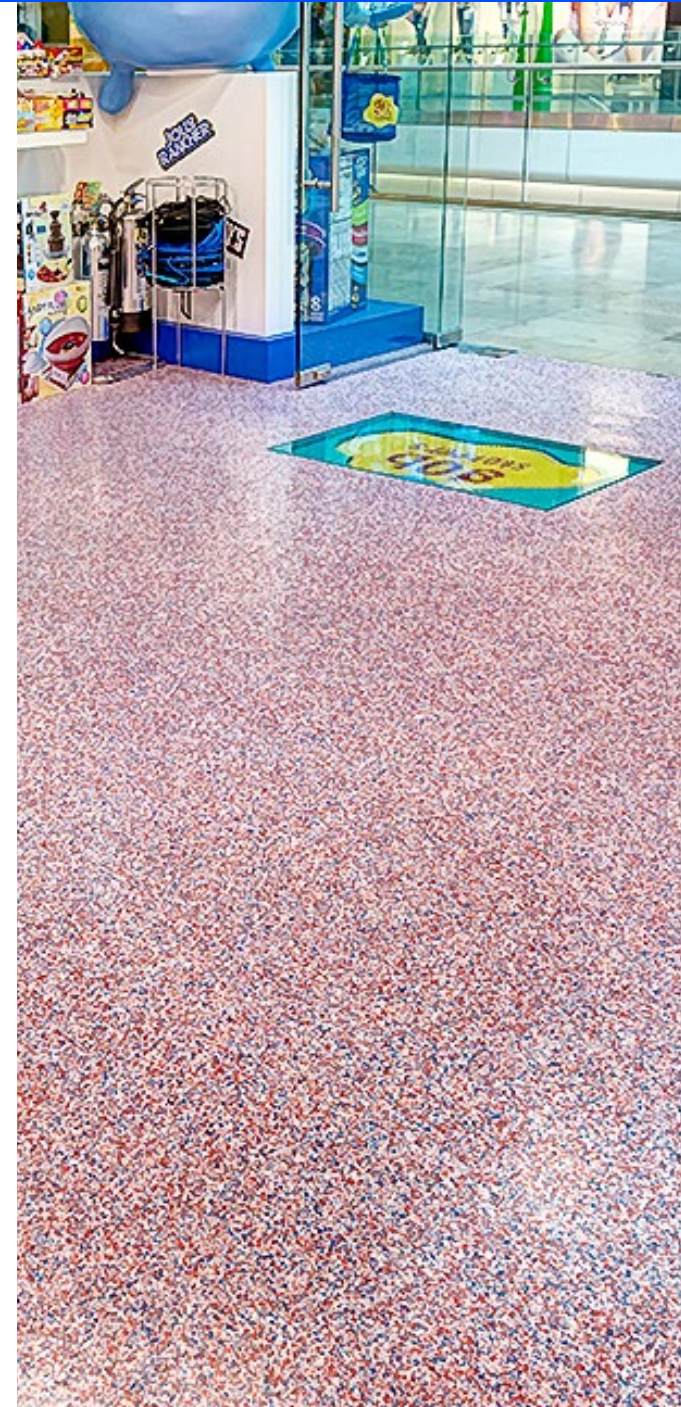

- ▶ Floors that are fit for purpose.
- ▶ Accurate quotations and proposals.
- ▶ Realistic installation programmes.
- ▶ Reduced risks of additional costs and onsite delays.

AFTERCARE & SUPPORT

At RESYN we place a strong emphasis on our flooring aftercare service to ensure that we maintain and strengthen relationships with our clients and to maximise the longevity and effectiveness of the floor.

- ▶ Cleaning packages.
- ▶ Cleaning advice and support.
- ▶ Onsite cleaning demonstrations.

TURNKEY FLOORING PACKAGES

Many of our customers prefer the ease of working with one company to coordinate and project manage their schemes. Therefore, RESYN offers comprehensive turnkey solutions. As a result of this, we are able to cater for all flooring and flat roofing requirements including services associated with these works.

Since we take on the responsibility as one package, we can therefore offer seamless delivery and complete projects within specified timeframes.

- ▶ Removal of existing / defective floor finishes.
- ▶ Overlay of existing floor finishes (subject to condition).
- ▶ Subfloor preparation.
- ▶ Resin flooring solutions.
- ▶ Drainage solutions.
- ▶ Car park area and line marking solutions.
- ▶ Flat roofing solutions.
- ▶ Reinstatement of subfloor products, including fast curing underlay screeds and repair mortars and WBP Hardwood Marine Ply.
